Ola Controls

KNX Gateway v2.0

Features

- Using Weinzierl BAOS module. It is KNX Certified. BAOS is visible in ETS.
- Maximum of 1000 freely assignable ETS datapoints per one gateway
- Automation programming can be done easily in Olacontrols and no changes in ETS are required. Any KNX integration is hence faster.
- Possibility to integrate both KNX and Olacontrols IO extension devices in a single installation
- Free cloud backend without licensing fees and with zero network configuration - no static IP addresses required, no Dyn DNS, no VPN
- Energy consumption 7W
- Operating temperature: 0 - 75 °C
- DIN rail, 2 modules. Width 36 mm, height 59 mm.

KNX Gateway v2.0

Ola KNX gateway allows native integration between KNX hardware and Ola system.

ETS data points will become available and KNX installation benefits from Ola Controls App, cloud and advanced logic and controls from schedules & control rules to complex sun position logic and logic formulas.
