

SMART HOME

Wireless tech based on Ola Controls systems

Wireless Home automation

by Ola controls,

Is the use of **WiFi or ZigBee** wireless sensors, wall switches, cameras and much more. Thus to be able to remotely control your devices by **OlaSmart App**, setup a security system and make smart control rules that best fit your comfort and save energy at same time.

Why Smart Homes?

The answer is easy, Why not!

Some of the reasons,

- **Convenience**

With our mobile app or voice commands you can control lighting, A/C, home entertainment and every gadget connected to your system from anywhere.

- **Comfort**

You'll live in a dreamy house with scenarios that make life easier with sleep, movie or comfort mode.

- **All-in-One**

Replace remote controls for TV, satellite receiver, home theatre... etc with 1 Ola smart IR hub.

- **Energy saving**

You can programme the right lighting, temperature and more, this is efficient and will help you save electricity.

- **Security**

Check and secure your doors, windows and every corner of your house from your mobile and get peace of mind with a low cost security system just adding a few wireless sensors.

- **Fire protection**

Protect your family and your property with fire alarms that notifies you in the right moment.

- **IP Cameras**

Check your cameras wherever you are and take care of your family and value things.

- **Style**

Gorgeous single one touch button panel screen that combines elegance and aesthetics design.

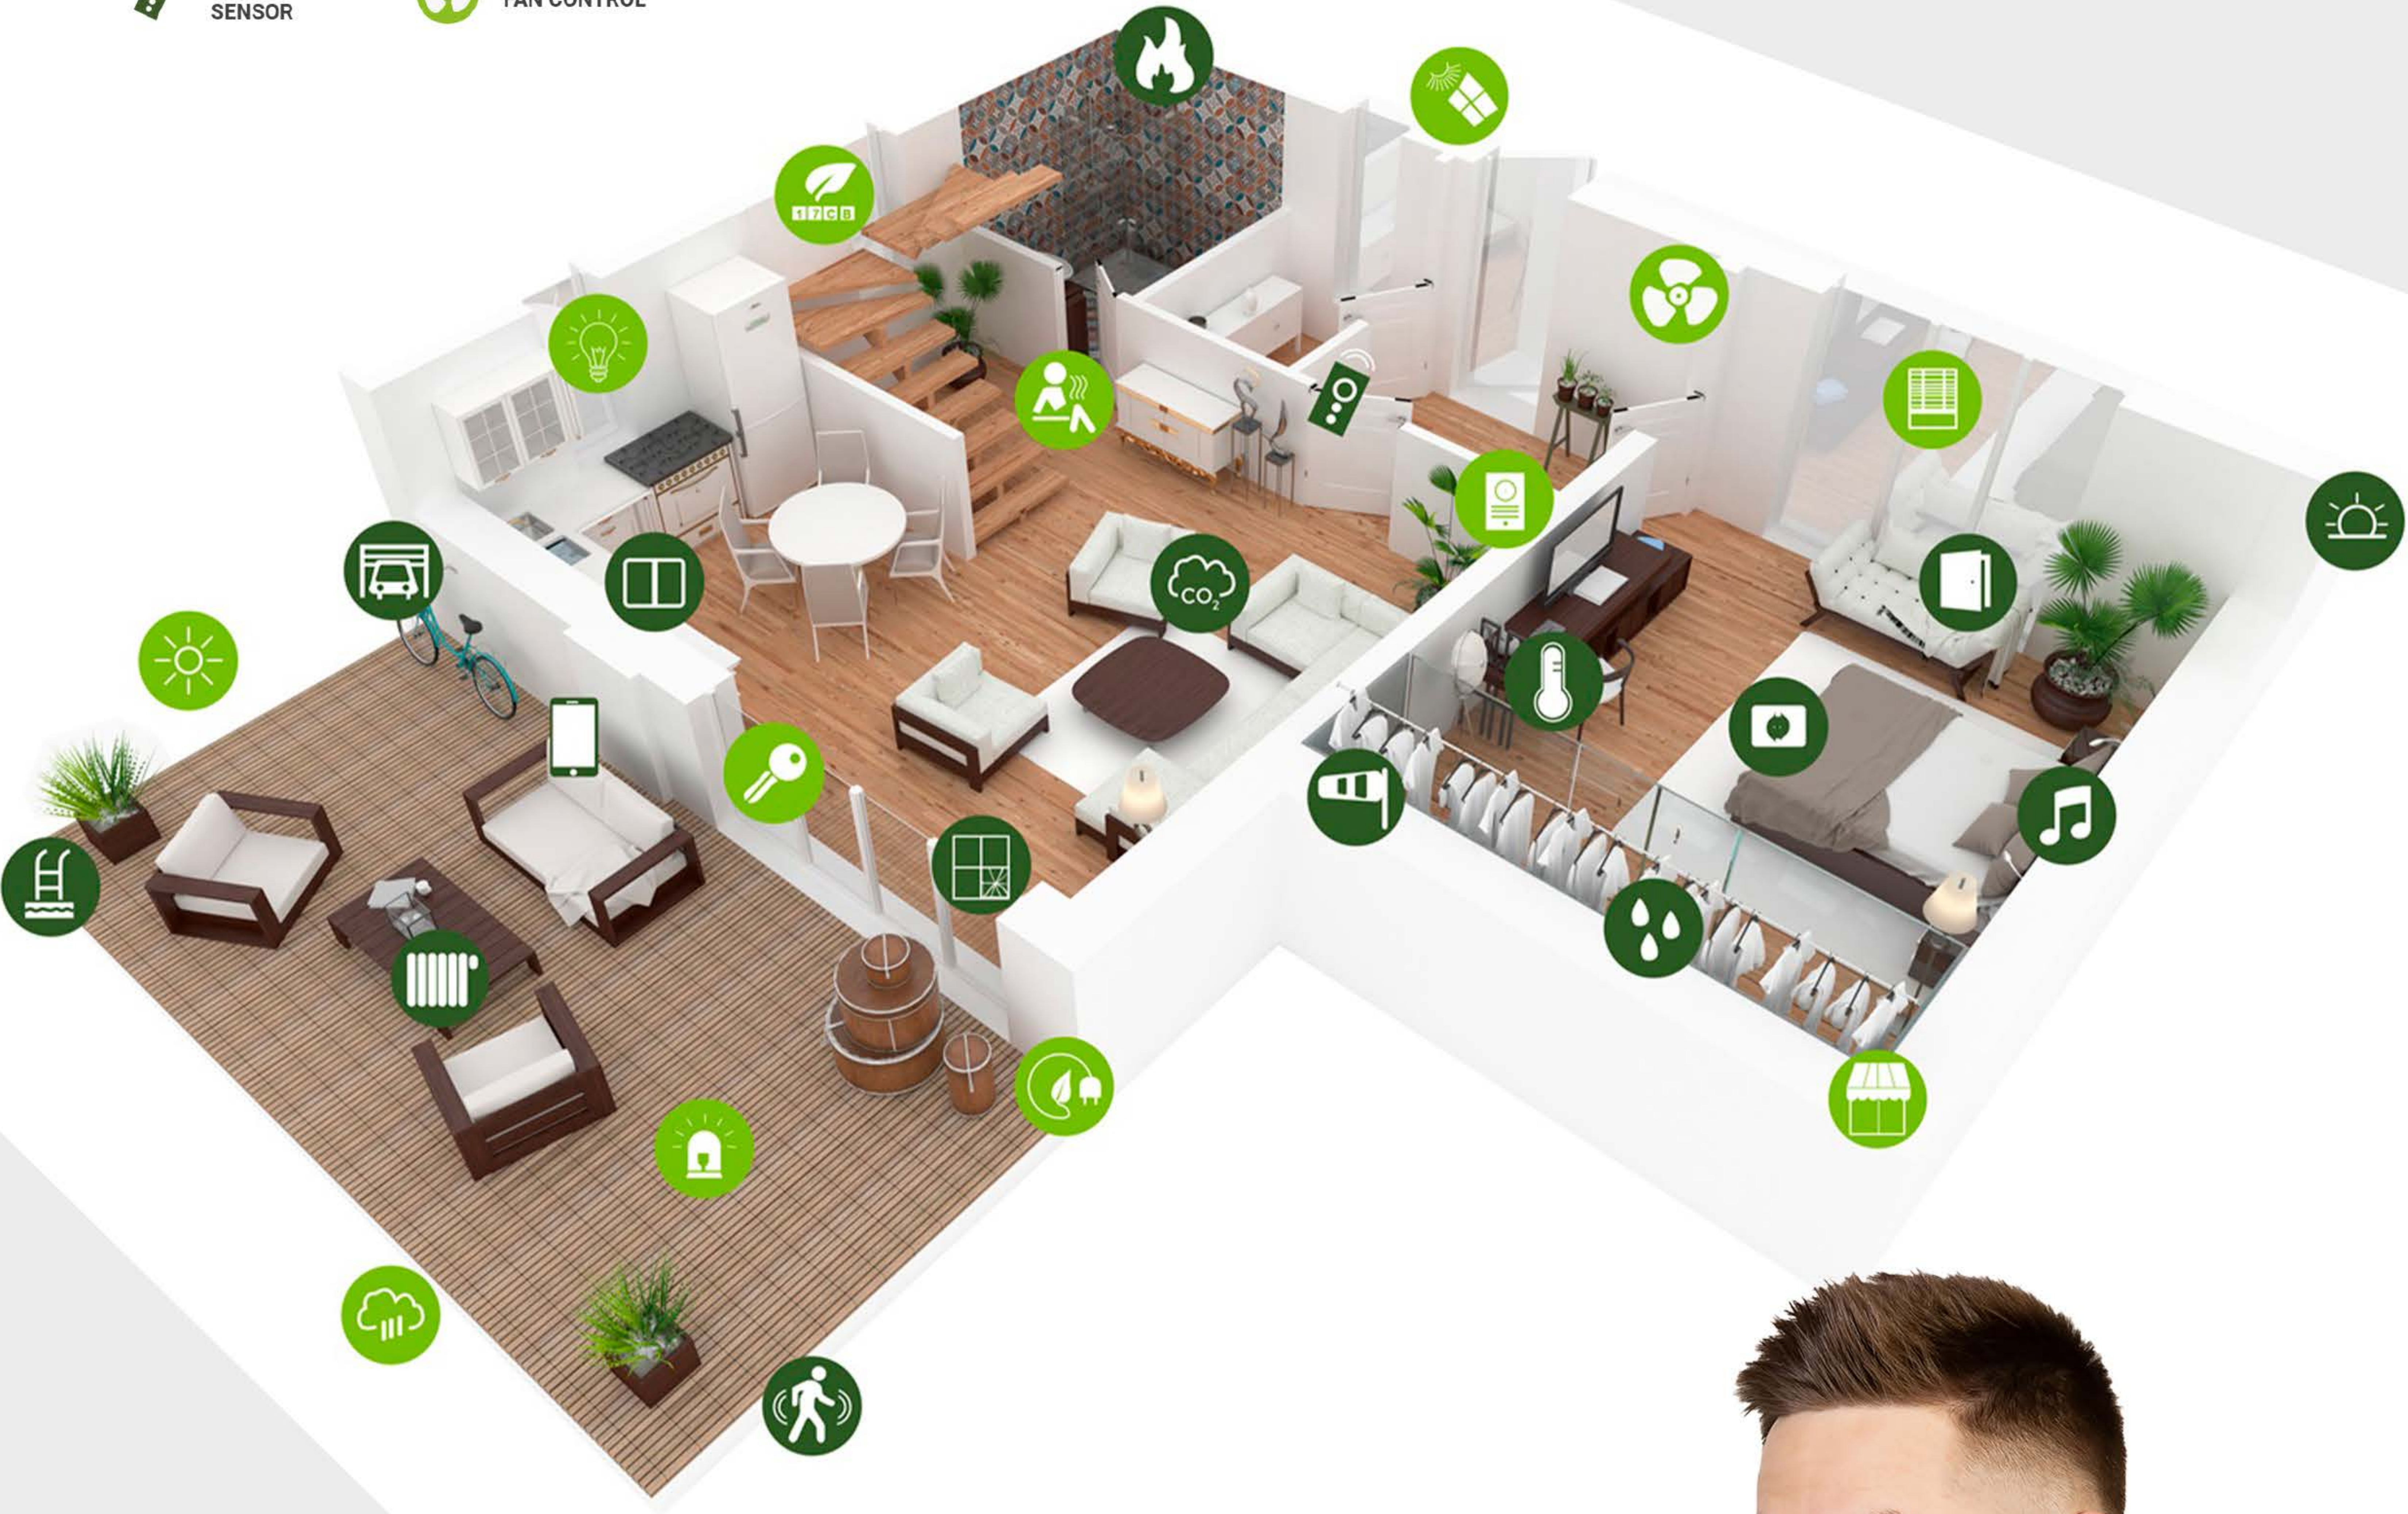

- **Customization**

Create your own lifestyle programming your amenities behavior in the way you like to have them. Set rules or schedules to automate tasks.

- **Retrofit solution**

For existing apartments, villas just replace the old wall switches with Ola wireless ones. No additional wires needed or Neutral wire.

LIVE COMFORTABLE

Your home at the tap of your finger.

With our Ola Lighting control systems you can get lights On/Off over your house or around the world since your smartphone, also you can get Dimming controls that reduces the output and energy consumption of light sources. Also, you can enhance your property using RGB/RGBW lighting with our smart technology, turn your space into a mind-blowing one... just turn on your creativity with ola controls wireless system.

Having several IR remote controls for A/C, TV and Home entertainment system? You can include the most used functions within our App and eliminate the need to keep all these in hand, get the control via IR hub.

Change room temperature from your couch, now HVAC systems control via same IR hub.

You could control all AV equipment from 1 place; create pre-configured scenes to activate later with 1-click.

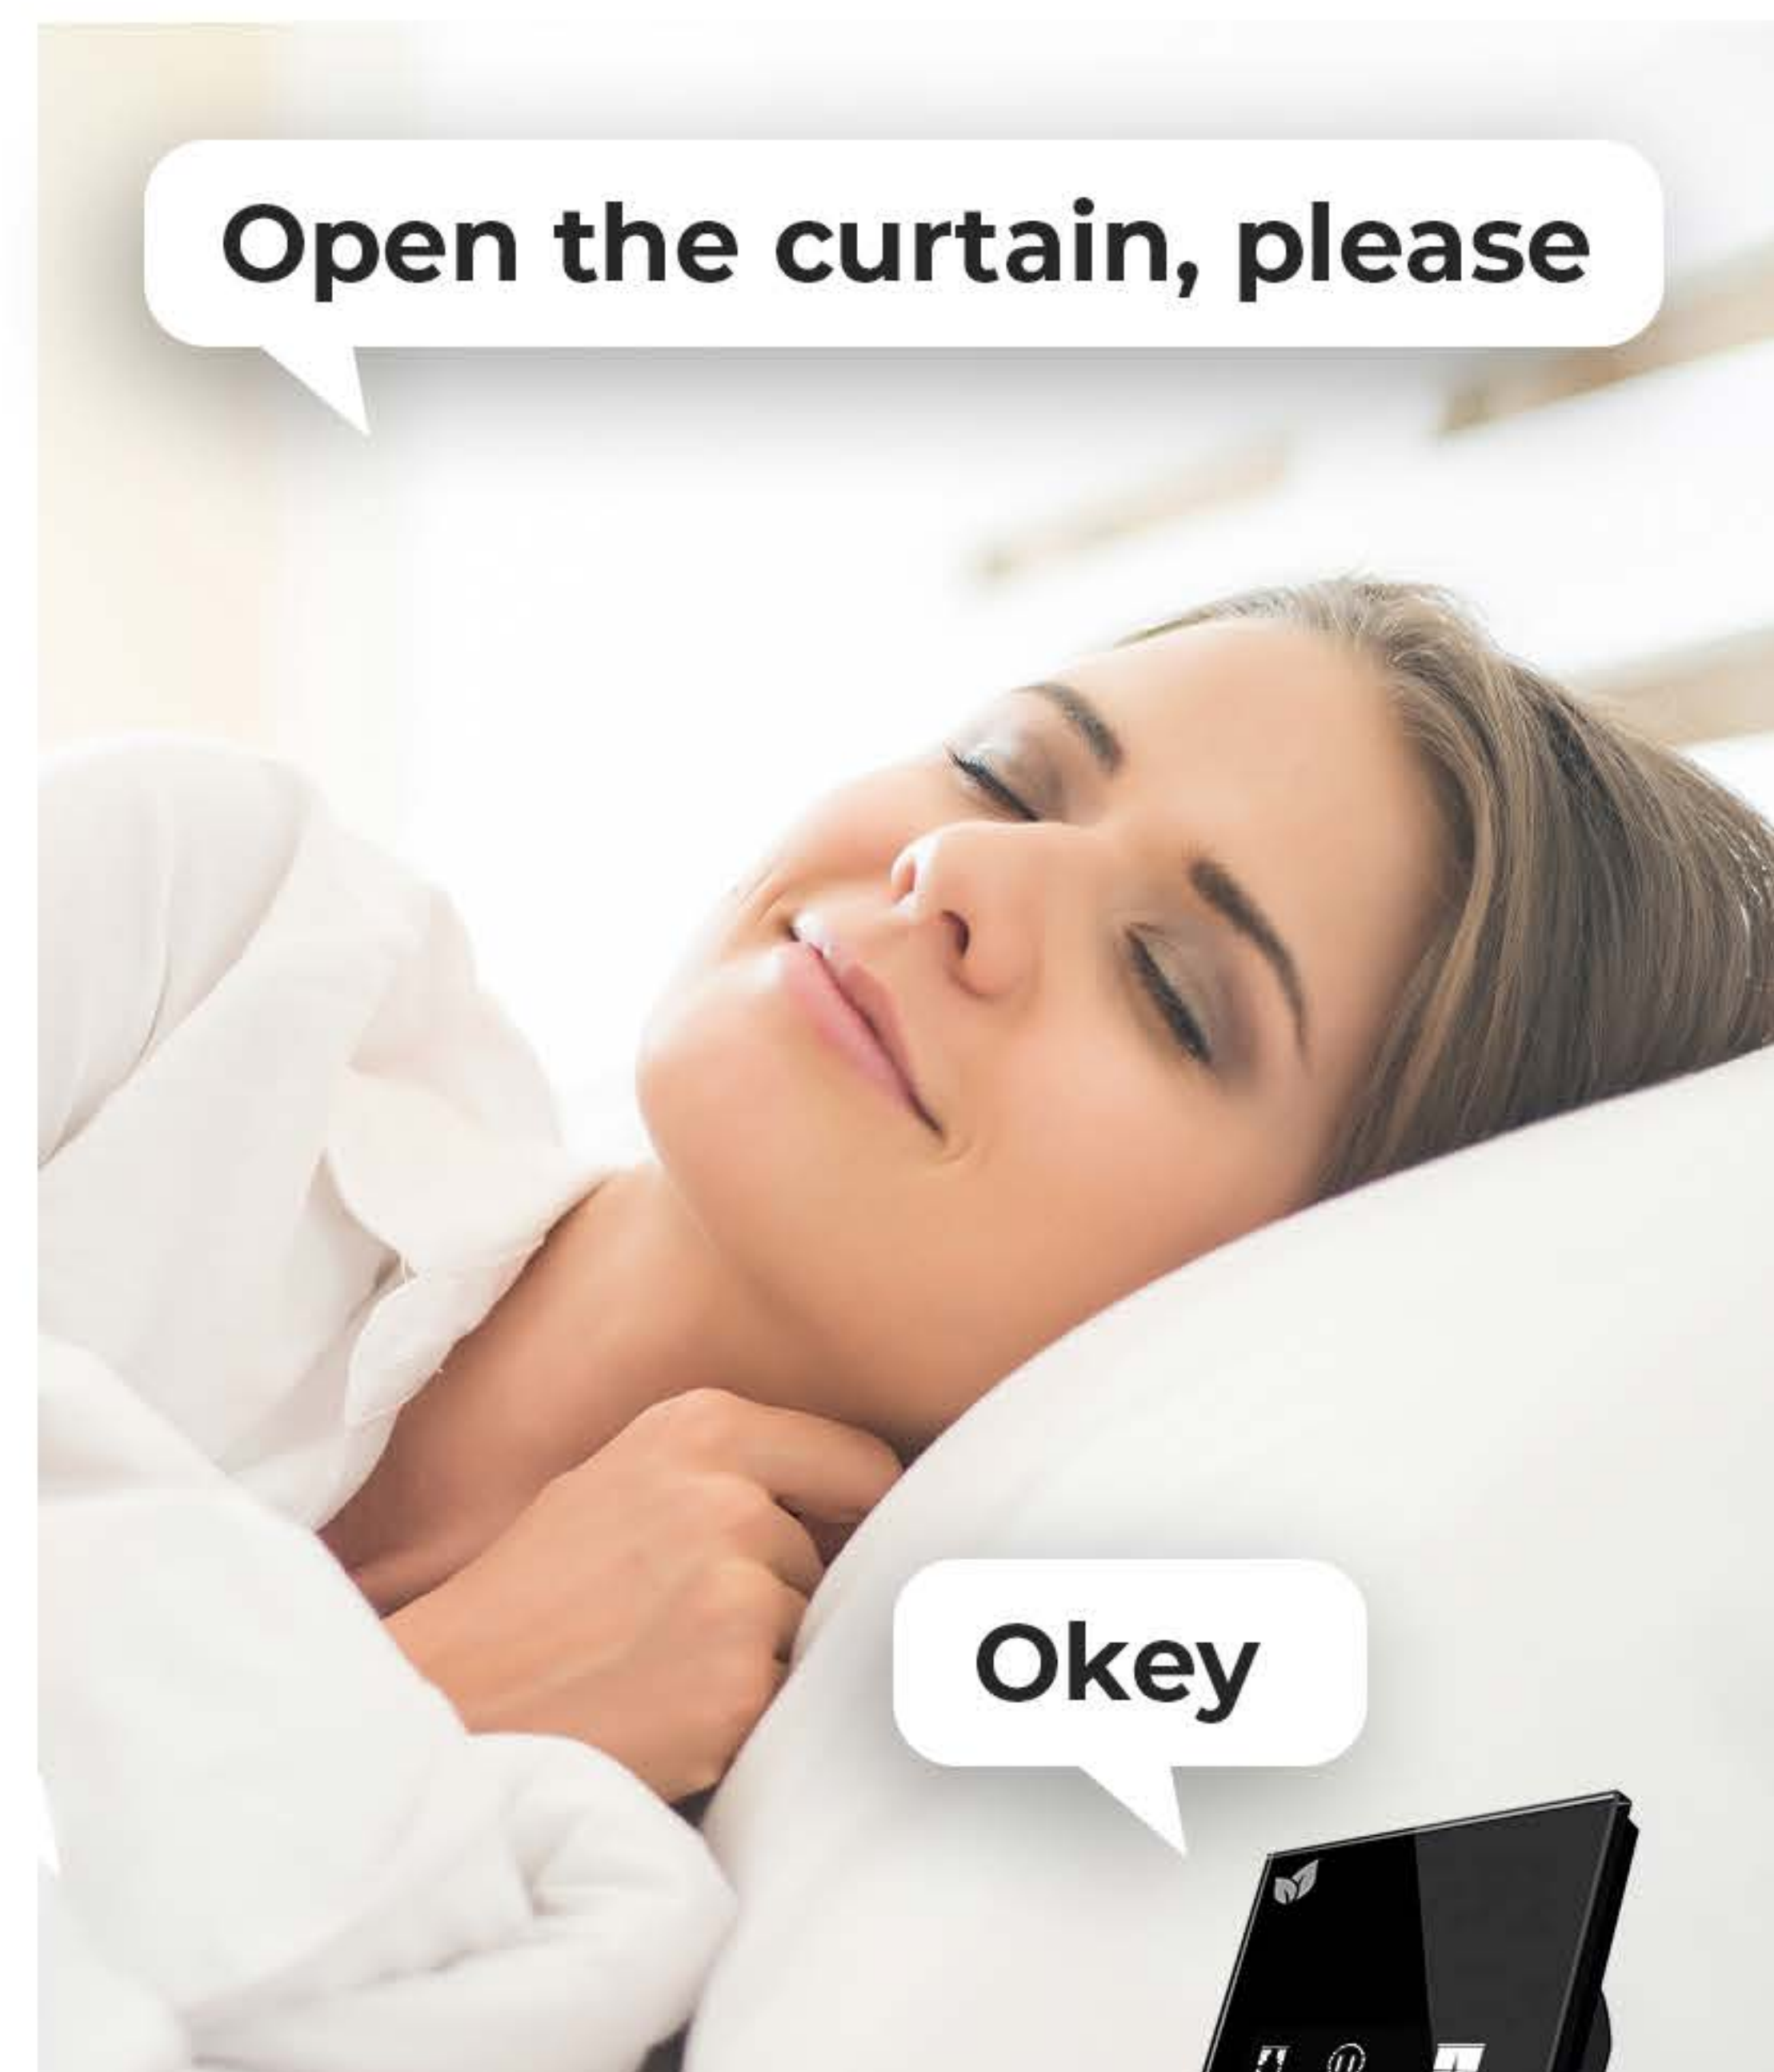

Are you sleepy? Open/close your curtains with your Smart wireless curtain motors.
